

All Results

The All Results tab includes results sent by contributing organizations such as laboratory, radiology, and transcribed reports. You can view the results of a patient using two methods: the All Results tab or widget. To begin this process, you will need to navigate to the Patient Charts screen.

All Results tab

The All Results tab screen is displayed below.

The screenshot shows the 'All Results' tab selected. At the top, there are filters for Type (All, Lab, Blood Bar, Micro, Path, Radiology, Cardio, Trans, Other) and Status (All, Final). A 'Date: All' filter is also present. Below these are two tables. The first is a list of results with columns for Test, Alert, Date, Type, Provider, Status, Source, and Source Document. The second is a detailed view for 'Ethanol Level2' showing reported and specimen received dates, specimen type (Blood), and status (Final). It also includes an ordering provider (MD PROVIDER, SEVEN K) and ID (1306915681). A table below shows test results for Ethanol Lvl and ETOH% with their respective values, ranges, interpretations, and statuses. At the bottom, there is a table for Source Organization, Document, and Date.

- Highlight the test on the left side of the screen to display the result on the right side.
- By default, results are sorted in chronological order. You can easily sort columns that include arrows next to the header titles. See the Date column above as an example.
- You can filter results by type, status, and date. Status is assigned by contributing organizations.
- The Alert column will display abnormal results in red text; the abnormal flag is assigned by sending organizations.

To print results

- Select the check box next to the Source Document for the result(s) you want to print.
- Select Print selected results at the top of the tab, above Source Document.

All Results widget

The All Results widget is displayed to the right.

- Results can be sorted by the name of the Test, Provider, Date, and Status.
- Results can be filtered by Status; select either All or Final.

The screenshot shows the 'All Results' widget. It has a 'Date: All' filter and a 'Status' dropdown set to 'All'. Below is a list of results with columns for Test, Alert, Provider, Date, Status, and Source. A detailed view for 'Ethanol Level2' is shown on the right, including reported and specimen received dates, specimen type (Blood), and status (Final). It also includes an ordering provider (MD PROVIDER, SEVEN K) and ID (1306915681). A table below shows test results for Ethanol Lvl and ETOH% with their respective values, ranges, interpretations, and statuses. At the bottom, there is a table for Source Organization, Document, and Date, and a 'Close' button.

Result Information screen

The Results window is displayed to the right.

- Clicking a result from either the widget or tab displays a window that contains information on the selected result.
