- By default, the Problems tab is included on the Patient Charts screen.
- You can search for problems by name or code in the search fields at the top of the tab.
- You can filter problems by status and onset date.
- Problems are sorted in chronological order by most recent onset date. You can sort by clicking on the column headings with arrows next to them. See the Onset Date column above as an example.
- Problem statuses are assigned by the contributing organization.
- You can print problems by selecting the [Print](#) link at the top right of the tab above the source document column.

### Problems widget

The Problems widget screen is displayed to the right.

- The Problems widget includes the same information, searching, and sorting options as the tab.
- You can print problems by selecting the [Print](#) link at the top right of the widget above the source column.

Problem/Condition	Code	Onset Date	Resolved Date	Status	Source
